PRINCIPAL'S MESSAGE

We believe deep learning occurs when students feel safe to take learning risks, when mistakes are seen as part of learning growth and when students are in predictable, supportive learning environments. At

Macquarie Primary School we pride ourselves on building connections with students to create the most conducive learning environment. We use Mind Up, an evidence based social emotional learning program, to support classes to create environments characterised by optimism, compassion, engagement, and resilience. We believe 'once students realise their minds matter, it makes a difference to how they'll learn. It reinforces the enjoyment and impact of the experience of learning' (Dan J. Siegal, MD)

At Macquarie Primary School we use Inquiry to engage students in their learning and challenge them to think deeply and apply skills and understandings to new contexts. - **Jodie Rowell, Former Acting Principal**
Current Principal, Kristy Grant
